

Community Update

MAY 2026

Our Vision

We embrace "Our City" and its historical Western lifestyle and values while being focused on socio-economic diversity with open eyes, minds, and hearts in keeping Sheridan the community of choice for all.

Our Mission

We are dedicated to improving quality of life through responsible stewardship of the resources entrusted to us, with emphasis on public safety, exceptional service, livability, and infrastructure, while being accountable and professional.

Our Core Values

Make a Difference - The primary purpose behind every City Staff action and activity is to make a positive difference in the lives of our Citizens.

Take Initiative - In the absence of guidance, we seize opportunities to advance the Mission of the City of Sheridan.

Build Trust - We must ensure that we daily earn the trust of the people of Sheridan, even when no one is watching us.

Show Optimism - A positive attitude is a force multiplier and is contagious. We look for opportunities in every situation.

Promote Teamwork - Together, Everyone Achieves More, and that only occurs through collaboration with others.

City Administration

Meetings of Note:

On May 5th, City staff presented its proposed budget to the City Council. To prepare, Department Heads identified and uploaded all mandatory budgetary items for the upcoming year and pinpointed items that fell into the categories of **investment** or **reinvestment** into our operations. We engage in this process to ensure reliable services and greater efficiency in our delivery of these services. Because there were not enough revenues to pay for everything identified, each department ranked their own items in order of priority. Once this was finished, we came together as a whole to rank-order all the items onto one, master list. Borrowing a term from math, we call this the **“1-N” list**.

At the point on the list where revenues run out, a red line is drawn. This line separates the funded items above from the items below, which must wait until revenues become available. Now that the FY27 budget has been presented to Council, the decision to adopt the budget as is or change it lies in the hands of the Governing Body. We have presented it in a manner that allows for two study sessions during which questions can be posed or changes suggested. On June 15th, the finalized budget will be open for a public hearing and voted on for approval. The accompanying presentation, 1-N List, and the draft budget book are all available

to the public on the City website for their scrutiny and consideration.

The Mayor and I attended the **Northeast Wyoming (NEWY)** meeting in Gillette on Saturday, April 18. The biggest topic was a new initiative from the Wyoming Association of Municipalities (WAM) which provides municipalities with temporary, gap-filling **treasurer support** if they find themselves with a sudden vacancy. Because cities and towns must continue meeting statutory financial requirements, this program would help ensure uninterrupted operations during staffing transitions.

Department Heads met on May 12 to discuss preliminary plans for a **Citizens Academy** this fall. The program will be designed to give residents a behind-the-scenes look at municipal operations and services. If this sounds interesting to you, keep an eye out for the application information coming in June.

The Sheridan County Chamber hosted its annual **“Local Government Update” luncheon** on May 13, where Mayor Bridger and I provided a brief update on the City. I also gave an educational presentation on the General Purpose Excise Tax (GPET) or **“One Cent”**, which will appear on the ballot this fall. Voters have the opportunity to consider renewal of this tax every four years.

I would like to take this opportunity to recognize **Dodie Bomar**. Dodie has been working for the City of Sheridan for 39 years as of May 11, 2026. Dodie began her career with the City as a Dispatcher. After a few years she took the Administrative Coordinator position with the Fire Department. Over those 39 years Dodie has worked with 7 different Fire Chiefs, 5 different Division Chief of Operations, 5 Fire Marshals, and 97 firefighters.

The knowledge that Dodie has of the Sheridan Fire Department is invaluable and not replaceable. It takes a unique combination of talents to coordinate the activities of a Fire Department and keep 24 firefighters going in the right direction day after day. We all appreciate you Dodie!

Gary Harnish, Fire Chief

Utilities

Customer Service

April - Customers Assisted				
	Avg.	2026	Change	% Change
In-person	908	1040	132	14.54%
Phone Call	1251	1362	111	8.87%
Total	2159	2402	243	11.26%
Permits				
	Avg.	2026	Change	% Change
Alcohol	8	9	1	12.50%
Street	4	2	-2	-100.00%
Special Event	1	1	0	0.00%
Mobile Vending	2	11	9	450.00%
Park	16	15	-1	-100.00%
Black Tooth Fields	49	66	17	0.00%
Passport Acceptance				
	Avg.	2026	Change	% Change
Applications	66	63	-3	-4.55%

Customer Service wears many hats and handles a wide range of responsibilities across the City, as illustrated in the chart on the left. While the percentage changes, particularly in the permits section, may appear significant, they are less dramatic when considering the smaller sample size.

As anticipated in last month's update, both permit applications and approvals increased, notably in mobile vending. Warmer weather encourages more people to be outdoors and, consequently, to apply for permits.

Tracking these trends is valuable for everyone, offering a clearer perspective on seasonal growth.

Customer Service is planning to update the City's utility bill format to offer customers clearer and more useful information.

The team has pinpointed several areas for enhancement and will keep evaluating options for improvement, drawing from both staff recommendations and customer feedback.

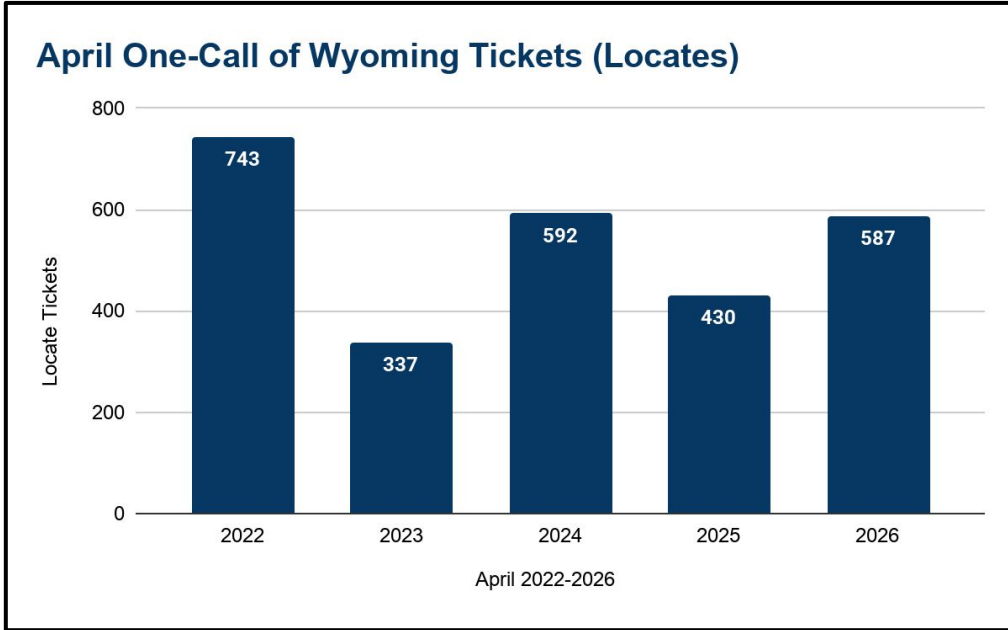

Funding for the bill format updates is provided for in the FY27 budget. Once approved, this work will proceed to implementation.

Utilities

Utility Services

Now that we're in a more predictable weather pattern, locates are starting to stabilize. As always, please call 811 before you dig!

Call 811 before you dig.**

Water & Sewer Permits

Need to apply for a water/sewer permit? Scan the QR code below to get the process started!

Or click the link: [Water & Sewer Permits](#)

Utilities

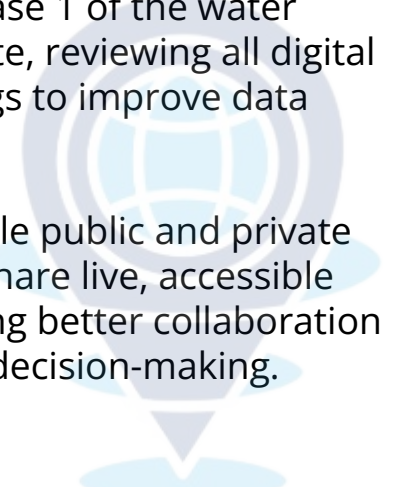

Utility Services

SCADA

- A crucial Turbidity Sensor was installed in Big Goose Creek above the Intake Diversion Dam and integrated into our SCADA System. Continuous turbidity readings from the creek enable more proactive water treatment, including the ability to cease diverting extremely turbid water.
- Continued optimization of Water Distribution System SCADA Radios.
- Reviewed the WWTP Upgrades Project and prepared for SCADA implementation.
- Began preliminary development work for SCADA upgrades at the Water Intake Facility.

GIS

- Upgraded the City's ArcGIS environment to 11.5, ensuring a reliable and current GIS platform for users and the GIS team.
- Completed Phase 1 of the water attribute update, reviewing all digital record drawings to improve data accuracy.
- Created multiple public and private web maps to share live, accessible data, supporting better collaboration and informed decision-making.

Information Technology

The IT Division finished installing new gateways in the 911 system. These gateways facilitate the entry and exit of 911 calls, enabling the system to route them correctly. This action concludes a 911 upgrade that began in October, the completion of which was postponed by a firmware problem with the Motorola equipment.

The Police Department successfully upgraded its battery backup system, which supplies power to IT systems during outages. The IT division supported this upgrade by calculating power requirements and safely managing the system shutdown and restart during the installation process.

Solid Waste Division

The annual Spring Free Day, held at the Landfill on Saturday, May 2nd, brought together the Trees for Trash and Community Clean Up events. Sheridan Media supported the event by distributing Mountain Ash saplings on-site. Participation in Trees for Trash remained steady, with 610 loads of waste recorded (a slight decrease from 639 loads in 2025).

The Community Clean Up event achieved its highest attendance since 2019, drawing 206 volunteers who cleaned various locations within City limits. These volunteers collected a total of 700 lbs. of trash. As a thank you, volunteers were given stickers and plantable pencils that grow into daisies.

To promote Earth Day and recycling, we hosted tours for local elementary schools this month.

We were delighted to spend time with students from Holy Name Catholic School (grades K-5) and the 5th graders at Coffeen Elementary!

Wastewater Treatment Plant (WWTP)

Construction is starting to enter the final phases for the north clarifier replacement. Construction crews have been working hard pouring concrete and cleaning up the site. Assuming this trend continues we are anticipating having the project wrapped up in the next few weeks.

The wastewater treatment plant processed a total of 71.56 million gallons in April, averaging 2.091 million gallons daily, with a maximum daily flow of 2.8 million gallons.

Solids removal averaged 97% which exceeds environmental discharge standards. Overall, the plant is operating very well as we approach the summer season.

With the shift to spring and summer operations, the wastewater treatment team has been active. Mowing operations have resumed for the year, and maintenance crews are focused on clearing vegetation around the plant.

Utility Maintenance

Four operators from the Utility Maintenance (UM) crew recently attended the Wyoming Association of Rural Water Systems (WARWS) conference in Casper to earn continuing education hours. Participation in these conferences allows the crew to secure the credits necessary to renew their DEQ-mandated collection and distribution certifications every three years.

Additionally, these events provide valuable opportunities for networking with fellow operators and staying informed about the latest tools and technological advancements within the industry

Sanitary sewer repair (Sinkhole) at 11th and Yonkee

A sinkhole developed next to a manhole, prompting the UM crew to conduct a video inspection of the sewer line. The inspection revealed that an uncapped sewer service stub out had caused significant soil erosion into the pipe, leading to the sinkhole. The crew resolved the problem by excavating the area, installing a cap on the pipe end, and completing the backfill.

Utility Maintenance

10" Sanitary sewer repair - Short Rd. & Big Horn Ave.

The Utility Maintenance (UM) crew was called to a sewer blockage in the Mountain Shadows subdivision. Upon investigation, they discovered the blockage was caused by a contractor performing utility trenching, who had inadvertently severed the City's 10-inch PVC sanitary sewer line.

The break was located three and a half feet (3-½ ft.) deep, just south of the intersection of Short Road and Big Horn Avenue. The crew used the Vac truck to access the damaged line, then successfully repaired it by installing a new segment of PVC pipe and securing it with two Fernco fittings.

We extend significant commendation to Erik Kerns from the City Service Center. His exceptional commitment in volunteering his time to promptly repair a hydraulic leak on the Vac truck was crucial, allowing the Utility Maintenance crew to proceed and successfully complete the sewer repair in a timely manner.

Utilities

Water Supply & Treatment

Installation of the intake turbidity sensor is complete.

Turbidity sensors are equipment used to measure the cloudiness or haziness, as well as the concentration of total dissolved and suspended solids, in a solution.

A turbidity sensor is an analytical sensor designed for this measurement.

Annual respirator fit testing has been successfully completed. During the test, each water operator entered a plastic enclosure while wearing their respirator. A scent was then sprayed into the enclosure while the operator read a provided text. The test is considered successful if the operator can read the text without smelling the sprayed scent.

Utilities

Water Supply & Treatment

SPRING MAINTENANCE

Water Treatment Operator, Tyller Brummett, has started spring maintenance at the water treatment facility to include painting the railings leading to the pipe gallery.

WTP CITY TOUR

Last month, a monthly department tour was held at the Sheridan Water Treatment Plant. Supervisor Jerrod Trangmoe did a great job of leading the tour of city employees and a city council member.

TWIN LAKES LEVELS

Following up on last month's snowpack update: Superintendent Tom Manolis visited Twin Lakes and reports the water level is down nine feet. However, no worries, he still anticipates it will reach capacity with the upcoming snow melt.

Parks Department

Parks Department Irrigation Season & Water Conservation Efforts

As we move into the warmer months, the City Parks Department is officially beginning irrigation season. Our crews have started activating and inspecting irrigation systems throughout city parks, green spaces, pathways, and landscaped public areas to ensure everything is operating properly and efficiently.

This year, irrigation season begins under extremely dry conditions and continued concerns regarding limited water availability. Because of this, the Parks Department is placing a strong emphasis on water conservation practices to help protect one of our community's most valuable resources.

Water Conservation in Our Parks

The Parks Department is actively implementing conservation-focused irrigation practices, including:

- Inspecting systems for leaks, broken heads, and inefficient coverage
- Adjusting watering schedules to reduce waste and runoff
- Monitoring weather conditions and limiting watering when possible
- Prioritizing efficient watering methods to keep turf and trees healthy while using less water

Parks Department

Why Proper Irrigation Matters

Efficient irrigation is not just about keeping our parks green—it's about using water responsibly. Overwatering, watering during high heat, and poorly adjusted sprinkler systems can lead to significant water loss through evaporation and runoff. In a dry year, these losses add up quickly.

A Shared Responsibility

Water is a limited resource, and in times like these, it is more important than ever that we treat it with care. The Parks Department is committed to doing its part to conserve water while maintaining safe, healthy, and enjoyable parks for the community.

We also encourage residents and local businesses to consider their own irrigation practices by checking sprinkler systems, fixing leaks, and adjusting watering schedules to reduce waste.

Together, we can protect our water supply and ensure our parks and landscapes remain sustainable for future seasons.

Thank you for your continued support of our City parks and your commitment to responsible water use.

Police Department

Training Update

Communications Technician Alison Shaffer completed the Communications Basic Training Course at the Wyoming Law Enforcement Academy on April 24, 2026. Congrats Alison! Officer Trevor Simon is currently attending the Peace Officer Basic Class at WLEA to obtain his basic certification. Officer Moss also attending ARIDE (Advanced Roadside Impairment Driving Enforcement) in Gillette, WY in April. This course is 16 hours of instruction on drunk and drug impaired driving recognition and enforcement. Admin Coordinator Sarah Benavidez and Communications Systems Coordinator Becca Hartman attend the Motorola Summit Training Update regarding our Report Management System.

Sworn Staffing Update

The department currently has four (4) open positions to fill to reach the allocation of 31 sworn police officers. We currently have one (1) certified officer candidate in the background phase of hiring. We also have several individuals scheduled to test in May. Overall, the trend seems to be upward and the department is looking forward to adding to our ranks. With that said, in addition to our vacant positions, the department has two (2) officers out with injuries and another attending WLEA, causing some shift shortages.

Communications Staffing Update

The department is once again at full strength with the hiring of Travis Prince as a Communications Technician. Travis has begun his training on April 15, 2026. This vital position has a full strength of ten (10) technicians and one (1) systems manager, who is also a certified communications technician. The department is anticipating a vacancy in July as one (1) of our technicians has accepted a position with the US Customs and Border Patrol beginning in mid-July.

Community Service Officer Staffing Update

Mikayla Langer is set to begin employment with the Sheridan Police Department, as a Community Service Officer, beginning May 18, 2026. The department also anticipates the long awaited return of CSO Ed Boone, which should be right around the corner. This will bring the CSO division to the allocated strength of two (2) individuals. The return of our CSO division will greatly assist our already relatively depleted patrol division, as in the CSOs absence, patrol officers have been handing calls traditionally dealt with by a Community Service Officer.

- **\$276,993.68**

Department Update:

- 7 Brew Co. now open
- Sheridan Flats in foundation phase
- Holly Seed building has been demolished by the school district - greenhouses remain
- Several projects in review or progress at Sheridan College

Code Compliance:

3 Total Complaints

- **1** Zoning
- **1** Visibility Triangle
- **1** Unsafe Embankment

Public Works: Streets Department & City Shop

Overall activity has remained moderate; however, several major and labor-intensive projects have been completed or are currently in progress.

Spring crack sealing operations have been completed using approximately four pallets (10,400 pounds) of Elastoflex material. Crews have also begun reassembling the hot plant with replacement components, and installation of the drum is scheduled for May 19, 2026.

In addition, crews have continued Dur-Patching and cold patching operations to improve roadway surfaces.

We welcomed two new employees to the team and are now operating with a full staff.

Our CDL trainer has also been working closely with new employees to support them in obtaining their commercial driver's licenses.

During April, the shop focused primarily on completing annual services for the City's fire equipment. Much of the fleet is beginning to show its age, with several units requiring additional repair time during servicing, contributing to a lower monthly total of 30 completed tasks.

Staff also worked on servicing golf course equipment that had not previously been maintained by the shop. Due to the variety of equipment and limited local parts availability, crews have found the most effective process is to inspect units in person, verify filter requirements, and then order the necessary parts before completing service work.

Public Works: Traffic/Signs

BY THE NUMBERS

Signs:

- Straightened **10** damaged posts
- Removed **1** radar sign - sent for repairs
- Replaced
 - o **2** damaged
 - o **17** faded
 - o **2** missing
 - o **4** sign anchors

Roadway Luminaire:

- Replaced
 - o **1** driver
 - o **1** photoeye

Decorative Lighting:

- Replaced
 - o **2** damaged decorative bases
 - o **1** complete pole/base

School Zone Signals:

- Installed **1** new battery
- Reset **1** clock/program

School Crosswalks-Thermoplastic Markings:

- Grind/Inlay Stop Bars
 - o **36 LF** of **24"** white thermoplastic markings
- Grind/Inlay Crosswalk Markings
 - o **96 LF** of **24"** white thermoplastic markings

Sheridan Public Art:

- Reinstalled **"Anthem"** on the new concrete base at 36 N. Gould St.
- Removed **"Black and White"** (Bumpers) & assisted the artist with loading
- Delivered
 - o **"The Hatch"** to Sheridan College for repairs
 - o **1** base to Craftco for repairs
- Relocated
 - o **"Stacked Frogs"** to the new concrete base at Mill Park (Lewis St. & W. Dow St.)
 - o **"Let's Play"** to Dow St. & N. Main St.
 - o **"Saturn and Titan"** to 144 S. Main St.
 - o **"Unlimited Horizons"** to 29 N. Gould St.

The Traffic/Sign Division assisted with the following:

- Removal/Installation of **6** banners for the Downtown Sheridan Association.
- Updating **1** light to LED at the Kendrick Park Shop
- Replacing **2** receptacles & **2** light switches in the mechanic's shop

Human Resources

Human Resource Hiring Update

We're excited to announce that multiple seasonal positions and internship opportunities are now available! These roles offer a great chance to gain valuable experience, build new skills, and contribute to our team. Interested individuals are encouraged to apply and take advantage of these rewarding opportunities.

Monthly Employee Department Tour

Last month, employees had the opportunity to take a special department tour of the Water Treatment Plant. The visit offered an inside look at the critical work that goes into providing clean, safe water to our community every day. Thank you to the Water Treatment team for hosting and sharing your expertise — and to all the employees (and Councilmember) who joined in to learn more about this essential part of our operations!

City Clerk

INTERESTED IN RUNNING FOR CITY COUNCIL?

VISIT THE CITY CLERK'S OFFICE TO APPLY
(2ND FLOOR OF CITY HALL)

 FILINGS OPEN: MAY 14 – MAY 29
 MONDAY–FRIDAY, 8 AM – 5 PM
 CLOSED MEMORIAL DAY

2026 ELECTIONS

Primary ElectionAugust 18, 2026
General Election November 3, 2026

City Clerk Ashlee Foster is headed to Reno to attend the International Institute of Municipal Clerks (IIMC) Annual Conference as the organization celebrates its 80th year. The conference provides municipal clerks from across the world the opportunity to participate in professional development, certification training, and networking with peers in local government.

Conference sessions include topics such as *Beyond the Bylaws*, *Stop the Minutes Madness*, *Off Script – Beyond Making a Motion*, *Real Time Leadership*, and many others focused on strengthening leadership, meeting management, governance, and municipal operations.

Attendance at the conference also allows the City Clerk to earn required education credits toward obtaining the Certified Municipal Clerk (CMC) designation, a professional certification that supports effective, transparent, and efficient local government administration.

Municipal Court

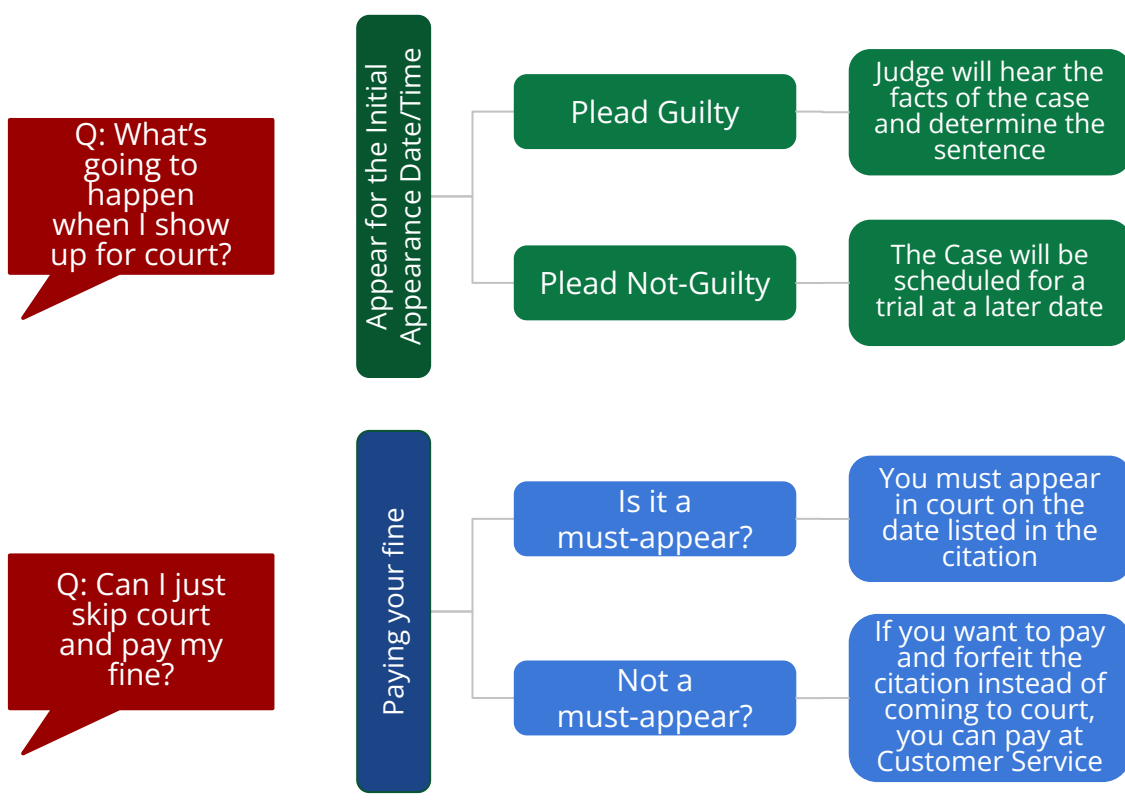

We are thrilled to announce we have filled the position of Assistant Municipal Court Clerk! This position was vacant for several months, and it has been a breath of fresh air for Christie, our Senior Court Clerk, to have someone back in the role supporting day to day court operations.

Marissa joined us at the end of April and is already quickly learning the ropes. She brings a positive attitude and valuable experience that will help her thrive in this position, and we are excited to have her as part of the Clerk's Department.

Welcome to the team, Marissa!

Court Questions? The Municipal Court Clerks cannot offer any form of legal advice, however they can help answer any questions about how the court itself works and what to expect during your court process. Here are a couple of common questions:
